Acknowledgments

This report was prepared in the Governments Division by the Finance Branch, headed by **Henry S. Wulf**, under the direction of **Vance Kane**, Assistant Division Chief for Economic Statistics. Data were reviewed by **David F. Patching. Maurice Criz**, Senior Adviser, was responsible for planning and review of this publication.

The data in this report were assembled and processed under the administration of **Alan R. Jones**, Assistant Division Chief for Operations. **Genevieve M. Speight** and **Ulvey S. Harris**, managing the Eastern and Western Sector Branches respectively, directed the data compilation effort. **Daniel L. Pflum**, of the Computer Utilization Branch, headed by **Judith Jennings**, coordinated the data processing and computer operations.

Publications Services Division provided advice and service in the preparation of copy for publication. Publication copy was prepared in the Governments Division under the supervision of **Corrine W. Davis.**

The cooperation of the thousands of State and local officials in providing information for this report is gratefully acknowledged.

For further information regarding data contained in this report, contact **Henry S. Wulf**, Governments Division, Bureau of the Census, Washington, D.C. 20233 (area code 301/763-7664).

Appendix B: Definitions of Selected Terms 161

INTRODUCTION

Local governments in 75 major standard metropolitan statistical areas (SMSA's) account for over three-fifths of all local government finances in the United States. Approximately 120.6 million persons, or 53.2 percent of the population of the United States, resided within these areas in April 1980.[1]

Each standard metropolitan statistical area consists of a single county area or a group of contiguous counties except that in New England such an area consists of a group of contiguous cities and towns. Each such area includes at least one "central city" of at least 50,000 inhabitants or—in some instances—contiguous twin cities which together meet this population minimum.[2]

The recent expansion in the financial scale of local governments in these major SMSA's since 1982-79 is indicated by the following figures:

Item	Amounts (millions of dollars)		
	1982-83	1980-81	1978-79
General revenue.	180,106	157,041	130,388
Direct general expenditure....	165,793	146,409	121,407
Debt outstanding	161,450	133,793	116,737

Item	Percent change	
	1980-81 to 1982-83	1978-79 to 1980-81
General revenue.	14.7	20.4
Direct general expenditure....	13.2	20.6
Debt outstanding	20.7	14.6

The 1982 Census of Governments recorded 15,905 local governments in these 75 areas, or 19.5 percent of all local governments in the United States. The number of governmental units per SMSA ranged from 4 in the Honolulu SMSA to 1,194 in the Chicago SMSA. Table A on page 2 provides a summary listing of the 75 SMSA's covered in this report and shows the April 1, 1980, population and the number of local governments as of 1982 within each SMSA.

These developments generally parallel nationwide trends in the finances of all local governments, as summarized most recently in the Bureau of the Census annual report, *Governmental Finances in 1982-83*. General revenue and direct general expenditure of local governments in the 75 SMSA'S comprise about 60 percent of total local government amounts in fiscal year 1982-83.

Item	Percent of local government total		
	1982-83	1980-81	1978-79
General revenue..	60.4	61.1	61.5
Taxes.........	65.0	65.0	65.8
Intergovernmental revenue	58.6	59.8	59.9
Charges and miscellaneous.	55.6	56.5	56.3
Direct general expenditure.....	59.0	59.7	60.3
Current expenditure...	59.2	60.0	60.8
Capital outlay.	57.5	58.3	57.3
Debt outstanding.	56.2	58.4	60.7

GENERAL REVENUE

In 1982-83, 61.1 percent of all general revenue of local governments in these major metropolitan areas was derived from locally imposed taxes, charges, and miscellaneous nontax local sources, with payments from States and the Federal Government accounting for the other 38.9 percent of the total. The

---

[1] The areas of the 75 SMSA's included in this report are in terms of their respective boundaries according to the June 1981 definitions by the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce. All population figures are for April 1980.

[2] Standard metropolitan statistical areas in New England are defined in terms of city and town boundaries rather than entire counties as is the case for such areas in other parts of the country. For this report, therefore, statistics were developed for New England County Metropolitan Areas which are defined in the same manner as SMAS's in other areas of the Nation.

following is a summary distribution of local general revenue, by source, for these areas, together with a corresponding distribution pertaining to all local governments in the United States.

Local governments' "intergovernmental revenue from the Federal Government" includes funds received under the Federal General Revenue Sharing program, amounting to $2.5 billion in 1982-83. Only local government revenue received directly from the Federal Government is included in this category. This revenue component does not include Federal aid-in-kind (such as surplus commodities distributed for public school lunch programs), or sums received by local governments through State distributive programs financed in part by Federal grants. In turn, local "intergovernmental revenue from State governments" includes all grants, shared taxes, and reimbursements for governmental services received from the States, including Federal funds channeled through the States.

Source	Percent distribution	
	75 areas	United States
Total general revenue	100.0	100.0
Intergovernmental revenue	38.9	40.0
From State governments	31.1	33.0
From Federal Government	7.8	7.0
From own sources	61.1	60.0
Taxes	40.8	37.9
Property	29.5	28.8
Other	11.3	9.1
Charges and miscellaneous	20.4	22.1

GENERAL EXPENDITURE

Of all direct general expenditure of local governments in these 75 metropolitan areas during 1982-83, 11.5 percent ($19 billion) was for capital outlay, including not only construction but also the purchase of equipment, land, and existing structures. The remaining 88.5 percent ($146.8 billion) was principally for current operation but included also interest on general debt ($7.7 billion or 4.7 percent of all direct general expenditure) and $5.3 billion of public assistance payments (3.2 percent of all direct general expenditure). For the Nation as a whole, local government public assistance payments decreased from 56.1 to 47.7 percent of all local direct expenditure for public welfare between the 1972-73 and 1982-83 fiscal years. These payments were affected by the assumption on January 1, 1974, by the Federal Government of direct payments to aged, blind and disabled recipients.

Much more local government expenditure is devoted to "education" than to any other public function. During fiscal 1982-83, education accounted for 39.1 percent of all direct general expenditure of local governments in the 75 metropolitan areas.

The following is a summary functional distribution of direct general expenditure made during 1982-83 by local governments in these areas and by local governments in the Nation as a whole.

INDEBTEDNESS

Outstanding debt of local governments in the 75 selected SMSA's totaled $161.5 billion at the end of their 1982-83 fiscal years, or $1,338 per capita. Over three-quarters of this was long-term debt for general government purposes, but about 24 percent was long-term debt incurred specifically for locally operated utilities (water supply, transit, electric power, and gas supply systems), and 6.8 percent of the total consisted of interest-bearing short-term obligations.

DATA FOR COUNTY AREAS AND MAJOR LOCAL GOVERNMENTS

County area finance data appear in tables 2 and 3 for each component of the 75 selected SMSA's, and in table 5 for large counties outside these SMSA's. County area data represent a summation of local government finances within each county unit, including the county, cities and towns, and school and special districts. Table 4 is not directly comparable with other tables presented in this volume. Finance data in that display show selected individual local governments within the 75 SMSA'S—specifically central cities and counties and large school and special districts—that is those governments which accounted for a significant portion of local government finances within the SMSA.

Table 3 reflects the considerable diversity in the relative financial scale of local governments among various metropolitan areas. For example, the average amount of local general revenue ranged in 1982-83 from less than $630 per capita in one of the 75 selected SMSA's up to more than $2,942 per capita in another of these areas. Per capita amounts of direct general expenditure generally reflect a similar range, and even greater variation appears for local government debt. Relatively less diversity generally appears among the component counties that make up any one multicounty SMSA, but even at this level of comparison there is often a significant difference in aggregate per capita amounts of revenue, expenditure, and debt, or in the composition of these financial measures.

Source	Percent distribution	
	75 areas	United States
Total	100.0	100.0
Education	39.1	42.5
Local schools	36.5	39.9
Institutions of higher education	2.7	2.6

Financial administration	1.5	1.7
Other and unallocable[1]	15.4	13.5

[1] Including the following functions, not shown separately in this report: Airports, correction, general public building, housing and urban renewal, libraries, natural resources, parking facilities, and water transport and terminals.

Explicit interarea comparisons based upon the data in tables 2 and 3 must be made with care. Two limiting factors need especially to be observed: (1) As more fully indicated below under "Sources and Limitations of Data," the statistics shown are estimates subject to sampling variation as well as to some possibility of reporting errors; and (2) there are considerable interstate differences in the role of local governments relative to the State government, and in arrangements for the financing of locally performed functions. Within some SMSA's local governments have the main responsibility, subject to varying degrees of financial assistance from the States, for providing particular governmental services that in other areas are handled directly by the State government. Variations of this nature are especially significant with regard to public welfare, highways, health and hospitals, and institutions of higher education.

Additional background for the consideration of such differences in the relative roles of local governments is available from Volume 5 of the 1982 Census of Governments, *Local Government in Metropolitan Areas*, which provides data on numbers of local governments, local public employees and payrolls, and local finance figures, for individual SMSA's and their component counties.

Some further background concerning the diversity of State-local relationships is supplied by table B, which shows the proportions of certain State-local financial measures that were accounted for by local governments in each of the 36 State areas that include the 75 SMSA's covered by the present report.

Interarea variations in the financial scale of local governments may also result from many other factors, including differences in such characteristics as the following: The age composition of the population; the proportion of the school-age population attending public schools; the density of population (often differing widely among various parts of a large SMSA); the relative role of governmental versus private provision of hospital care, of such other usual public services as refuse collection, and of water supply, electric, gas, or transit services (reflected in separate governmental "utility" amounts); and the prevailing levels of pay rates and living costs, which differ materially from region to region.

Table B. Local Government Portion of State and Local Government Aggregates of Certain Financial Items, for 36 State Areas

[1] The 36 State areas shown are those in which the 75 major SMSA's are located (except for outlying portions of two SMSA's, which extend into Arkansas, Iowa, and Mississippi).

MAJOR COUNTY AREAS OUTSIDE THE SELECTED SMSA's

Table 5 presents statistics on local government finances in 1982-83 for 69 urban county areas which were outside the 75 selected SMSA's. The counties included were those which had July 1, 1977 population estimates of 200,000 inhabitants or more. Population figures shown for each county area in table 5 are for April 1980.

As with tables 2 and 3, it should be noted that the data in table 5 represent aggregates for all governments in the county area, rather than individual county government figures.

SOURCES AND LIMITATIONS OF DATA

Data in this report represent estimates based on information collected by field compilation and mail questionnaire from a sample of local government units. The sample in each of the 75 largest SMSA's and 69 additional county areas includes with certainty all county governments, all municipalities (and townships in the New England and Middle Atlantic States) having an estimated population of 25,000 or more in 1975, all school districts with 6,000 or more enrollment as of January 1, 1977, all transit special districts, all junior college districts and any other local government whose relative importance in its county area, based on annual expenditure indebtedness, was above a specified level. A random selection was then made from a compilation of all remaining local governments in each county area grouped by type and size of government. The sample was chosen using probabilities based on the ratio of each government's annual expenditure or indebtedness to the county area total for noncertainty units.

For a limited number of relatively large local governments, information was compiled by Census Bureau personnel from official records and reports; but most of the basic data needed for this survey was obtained by mail, with detailed questionnaires calling for figures in terms of the census classification pattern. Followup correspondence was used extensively to clear up inadequacies and inconsistencies evident from examination of reported information.

Measurement of the sampling variation found in the estimates indicates that the relative error of the major data items presented for an entire SMSA is generally less than 5 percent at the 95 percent confidence level. Estimates for small components are subject to somewhat greater variability and should be interpreted with caution.

Because of rounding, detailed amounts in various tables will not in all instances add precisely to the total shown.

While careful review was applied to the data provided by individual governments, some errors of reporting or of data handling may have escaped detection.

Fiscal year 1981-82 SMSA data will be available in Volume 5 of the 1982 Census of Governments, *Local Government in Metropolitan Areas* (projected publication December 1984), which includes for each SMSA in the United States and for its respective component county areas, statistics for the various categories of local government finances that appear in this report. Any attempt at direct comparison of the two sets of data should take account of the estimated nature of the 1982-83 figures, as described above.

Data for counties between 50,000 and 100,000 population and cities between 25,000 and 50,000 population and selected sample jurisdictions and certain unpublished financial items can be obtained from Census Bureau data files. For further information, contact Chief, Governments Division, Bureau of the Census, Washington, DC 20233.

This report covering local government finances in selected metropolitan areas and large counties in 1982-83 will be superseded by a similar report covering local government finances in selected county areas in 1983-84.

ACKNOWLEDGEMENT

Grateful acknowledgement is made of the assistance of the numerous local governmental officials throughout the Nation who helpfully supplied information regarding the finances of their governments.

Note: Because of rounding, detail may not add to totals. Local government amounts included here are estimates subject to sampling variation; see text. Data for all fiscal years are for SMSA's in terms of their respective boundaries as defined by the U.S. Office of Management and Budget for June 1981.

X Not applicable.

[1] Based on population estimates for April 1, 1980.

[2] Based on population estimates for July 1, 1977.

[3] Includes local government liquor stores revenue of $201,118 thousand and expenditure of $179,802 thousand. Corresponding amounts are included in prior year data.

Note: Because of rounding, detail may not add to totals. Per capita data are based on population for May 1, 1980. Finance data are estimates subject to sampling variation; see the text. Utility finances include amounts for liquor store enterprises in Montgomery County, Maryland, and Minnesota and North Carolina counties.

- Represents zero or rounds to zero.

APPENDIX A
MAJOR INTERCOUNTY LOCAL GOVERNMENTS

The table below provides summary finance data for major local governments which serve populations in two or more county areas. Included here are cities having populations of 100,000 or more, school districts having enrollments of 40,000 or more pupils, and special districts having one or more of the following characteristics: $50 million or more total revenues, $50 million or more total expenditures, or $50 million or more gross debt. In tables 1 and 3 of this report, all data for these governments have been included in the county area in which the government's principal administrative office is located.

Selected multicounty local governments	County areas[1]	Finance amounts, 1982-83 (in thousands)		
		Revenue[2]	Expenditure[2]	Debt outstanding
Arizona:				
Salt River Project Agricultural Improvement and Power District	Maricopa, Gila, and Pinal Counties	1,033,205	1,071,213	2,541,149

- Represents zero. [1] County areas served in whole or in part by the individual multicounty government. The county area in which the government's principal administrative office is located is shown first. [2] Excluding interlocal revenue and expenditure. [3] Data are for fiscal year 1981-82. [4] Data are for fiscal year 1980-81.

APPENDIX B

DEFINITIONS OF SELECTED TERMS

A discussion of the terms and classifications used in this report is presented below. These terms are grouped in the following categories: Local Governments, Area Statistics, and Governmental Functions and Definitions.

Local Governments

A government is an organized entity whose governmental character is evidenced by popular election of the officials or their apointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other governmental unit.[1] The Bureau of the Census classifies local governments by five major types – county, municipality, township, school district, and special district. Following is a brief discussion of each type of local government:

County. Organized county governments are found throughout the Nation except in Connecticut, the District of Columbia, Rhode Island and limited portions of a few other States. These governments are legally designated as "boroughs" in Alaska and "parishes" in Louisiana. Excluded from county government statistics and included with municipalities or townships are certain local governments that combine area and governmental characteristics of both counties and municipalities or townships.

Municipality. A municipality is a political subdivision within which a municipal corporation has been established to provide general local government services for a specific population concentration in a defined area. A municipality may be legally termed a city, village, borough (except in Alaska), or town (except in the New England States, Minnesota, New York and Wisconsin). Included in this category are certain cities that are completely or substantially consolidated with their county governments, operate outside the geographic limits of any county, or for other reasons have no organized county government operations within their boundaries.

Township. Township governments, as distinguished from municipalities, are created to serve inhabitants of areas defined without regard to population concentration. This classification is applied to local governments in 20 States, including governmental units officially designated as "towns" in the six New England States, New York and Wisconsin, and some "plantations" in Maine and "locations" in New Hampshire.

School district. There is a marked organizational diversity in the types of governmental units that provide for the operation of public schools. School districts, which are governmental entities that are fiscally and administratively independent of any other government, are found in all but five States (Alaska, Hawaii, Maryland, North Carolina, and Virginia) and the District of Columbia. *Dependent school systems* are administrative agencies of other governments (States, counties, municipalities, and townships) and are not counted as separate governmental entities by the Bureau of the Census. Dependent school systems are found exclusively in the District of Columbia and the five States noted above and also exist in 11 other States.

Special District. Special districts are local governmental units created to provide specific services that are not being supplied by other governments. These governmental units are known by a variety of titles including districts, authorities, boards, and commissions. A majority of special districts are established to perform a single function, but some have been given authority to provide several, usually related, kinds of services.

Area Statistics

County areas. Selected data on local government finances are shown in this report by county area. These county area statistics are aggregates of all local government finances within the geographic boundaries of the county or county-type area.

The county areas used in this volume include areas with an independently organized county government and county-type areas without an independently organized county government, including the unorganized areas in Connecticut and Rhode Island bearing county designations, the "independent cities" in Virginia and other municipalities which are city-county consolidations or which are outside of any county designated area.

---

[1] For detailed information concerning the identification and classification of governments, see Vol. 1, *Governmental Organization*, of the 1982 Census of Governments.

Standard metropolitan statistical areas (SMSA's). Standard metropolitan statistical areas (SMSA's) are designated by the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, with the advice of the Federal Committee on Standard Metropolitan Statistical Areas. Each SMSA consists of a single county area or a group of contiguous county areas, except that in New England such an area consists of a group of contiguous cities and towns. Each SMSA includes at least one "central city" of at least 50,000 inhabitants, or a city with at least 25,000 inhabitants, which, together with those contiguous places having population densities of at least 1,000 persons per square mile, has a combined population of 50,000 or more and constitutes for general economic and social purposes a single community, provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000.[2]

Data for each New England metropolitan area shown in this publication are presented for the New England County Metropolitan Areas (NECMA's are defined in the same manner as SMSA's in States outside of New England.

There were 305 SMSA's and NECMA's in the 50 States and the District of Columbia at the time of the 1982 Census of Governments.

Governmental Functions

Agency and private trust transactions—Transactions excluded from census data on governmental finances because they involve receipt, holding, and disbursement of moneys by governments as agent or trustee for other governments or private persons, such as collection of Federal income taxes and social security "taxes," receipt and return of guarantee deposits, and the like.

All other and unallocable—The use of this classification varies from table to table in this report; in each tabulation, however, this classification represents all activities not individually specified.

Assistance and subsidies—For local governments this category is limited to direct cash assistance payments to public welfare recipients. See *Public Welfare*.

Capital outlay—Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure.

Cash and security holdings—Cash, deposits, and governmental and private securities (bonds, notes, stocks, mortgages, etc.), except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Charges and miscellaneous general revenue—Current charges, special assessments, and all other general revenue except taxes and intergovernmental revenue. See *Current charges; Special assessments*.

Current charges—Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services except those by liquor store systems and local utilities. Includes fees, assessments, toll charges, tuition, and other reimbursements for current services, rents and sales derived from commodities or services furnished incident to the performance of particular functions, gross income of commercial activities, and the like. Excludes amounts received from other governments (see *Intergovernmental Revenue*) and interdepartmental charges and transfers. Current charges are distinguished from license taxes, which relate to privileges granted by the government or regulatory measures for the protection of the public.

Current Operation—Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractural services except amounts for capital outlay.

Debt—All long-term credit obligations of the local government agencies whether backed by the local government's full faith and credit or nonguaranteed, and all interest-bearing short-term credit obligations. Includes judgments, mortgages, and revenue bonds, as well as general obligation bonds, notes and interest-bearing warrants. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from local government employee retirement funds.

Debt outstanding—All debt obligations remaining unpaid on the date specified.

Direct expenditure—Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments—i.e., all expenditure other than *Intergovernmental Expenditure*.

Education—Provision or support of schools and other educational facilities and services. The *Local Schools* category comprises all direct expenditure by local governments for education, other than any direct spending for institutions of higher education. *Institutions of Higher Education* include facilities and activities of all educational institutions beyond the high school level operated by local governments. These educational categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

---

[2] For a detailed description of criteria used to define SMSA's, documents are available from the Office of Management and Budget, Washington, DC 20503.

Employee-retirement expenditure—Cash payments to beneficiaries (including withdrawals of contributions) of government-administered employee-retirement programs. Excludes cost of administering retirement systems, and noncontributory gratuities paid to former employees. Also, excludes a government's contributions to a system administered by another government (such as city contributions to a State-administered system).

Employee-retirement revenue—Revenue from contributions required of employees for financing government-administered employee-retirement systems, earnings on investments held for such systems, and receipts of State payments for employees covered by local government systems. Excludes any contributions by a government, either as employer contributions or for general financial support, to an employee-retirement system. Tax proceeds, donations, any forms of revenue other than those enumerated above are classified as general revenue rather than employee-retirement revenue, even though such amounts may be received specifically for employee-retirement purposes.

Expenditure—All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

Financial administration—Officials and agencies concerned with tax assessment and collection, accounting, auditing, budgeting, purchasing, custody of funds, and other central finance activities. See also *General Control.*

Fire protection—Municipal, town, or county fire fighting organizations and auxiliary services thereof, inspection for fire hazards, and other fire prevention activities. Includes cost of fire fighting facilities such as fire hydrants and water, furnished by other agencies of the government.

General control—Governing body, courts, office of the chief executive, and central staff services and agencies concerned with personnel administration, law, recording, planning and zoning, and the like. See also *Financial Administration.*

General debt—All *Debt* other than that incurred to finance a *Utility.*

General expenditure—All expenditure of a government other than utility expenditure, liquor stores expenditure, and insurance-trust expenditure (see text).

General revenue—All revenue of a government except utility revenue, liquor stores revenue, and insurance-trust revenue (see text). All tax revenue and all intergovernmental revenue even if designated for employee-retirement or local utility purposes, is classed as general revenue.

Health and hospitals—Health services, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included here. Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

Highways—Streets, highways, and structures necessary for their use, snow and ice removal, toll highway and bridge facilities, and ferries. See also *Police Protection.*

Interest expenditure—Amounts paid for use of borrowed money. Interest, except that paid on debt incurred distinctively for local utility purposes, is classed under general expenditure. General expenditure for interest is not allocated to particular functions (education, highways, etc.), but is classed functionally as Interest on general debt.

Intergovernmental revenue—Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government (e.g., care of prisoners or contractual research), or in lieu of taxes. Excludes amounts received from other governments for sale of property, commodities, and utility services. All intergovernmental revenue is classified as general revenue. *Intergovernmental Revenue From State Government* includes any amounts originating with the Federal Government but channeled through the State for distribution to local governments.

Local government—Counties, municipalities, towns, school districts and other special authorities in their entirety as a unit of government, including all offices, departments, boards, and commissions. Financial amounts reported are intended to cover applicable sums for all bond and sinking funds, public trust funds, and other special funds and accounts (other than agency and private trust funds), as well as for its general fund, net of any duplicative transfers.

Long-term debt—Debt payable more than I year after date of issue.

Parks and recreation—Cultural-scientific activities, such as museums and art galleries; organized recreation, including playgrounds and play fields, swimming pools and bathing beaches; municipal parks; and special facilities for recreation, such as auditoriums, stadiums, auto camps, recreation piers, and boat harbors.

Police protection—Preservation of law and order and traffic safety. Includes police patrols and communications, crime prevention activities, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

Property taxes—Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or certain or all intangibles.

Public welfare—Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include: Cash Assistance paid directly to needy persons under the categorical programs (Old Age Assistance, Aid to Families with Dependent Children, Aid to the Blind, and Aid to the Disabled) and under any other welfare programs. *Other Public Welfare* includes payments to other governments for welfare purposes; amounts for administration, support of private welfare agencies, and other public welfare services.

Salaries and wages—Amounts paid for compensation of local government officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

Sales and gross receipts taxes—Taxes, including "licenses" at more than nominal rates, based on volume or value of transfers of goods or services, upon gross receipts therefrom, or upon gross income, and related taxes based upon use, storage, production (other than severance of natural resources), importation, or consumption of goods. *General sales or Gross Receipts Taxes* comprise such taxes which are applicable with only specified exceptions to all types of goods, or of goods and services, or of all gross income. Taxes imposed distinctively upon sales of or gross receipts from selected commodities, services, or businesses are reported under Other taxes.

Sanitation other than sewerage—Street cleaning, and collection and disposal of garbage and other waste. Sanitary engineering, smoke regulation, and other health activities are classified under Health and Hospitals.

Securities—Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Sewerage—Sanitary and storm sewers and sewage disposal facilities and services.

Short-term debt—Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

Taxes—Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalities but excluding protested amounts and refunds) from all taxes imposed by government. Note that tax revenue excludes any amounts from share of State-imposed-and-collected taxes, which are classified as intergovernmental revenue.

Utility—A municipally, town or county-owned and operated water supply, electric light and power, gas supply, or transit system. Revenue, expenditure, and debt relating to utility facilities leased to other governments or persons, and other commercial-type activities of governments, such as port facilities, airports, housing projects, radio stations, steam plants, ferries, abattoirs, etc., are classified as general-government activities.

Utility debt—Debt originally issued specifically to finance county, municipally, or town owned and operated water, electric, gas, or transit utility facilities.

Utility expenditure—Expenditure for construction or acquisition of utility facilities or equipment, for production and distribution of utility commodities and services (except those furnished to parent government) and for interest on utility debt. Does not include expenditure in connection with administration of utility debt and investments (treated as general expenditure) and the cost of providing services to the parent government (such costs, when identifiable, are treated as expenditure for the function served).

Utility revenue—Revenue from sale of utility commodities and services to the public and to other governments. Does not include amounts from sales to the parent government. Also excludes income from utility fund investments and from other nonoperating properties (treated as general revenue). Any revenue from taxes, special assessments, and fiscal aid is classified as general revenue—not utility revenue.
